Blk 17 Lot 25 Violeta St. Nepo Subd. Brgy. Cutcut, Angeles City, Pampanga

PROFILE SUMMARY

Driven, organized, and design-minded student who enjoys turning ideas into polished, working products and leading teams to deliver them. As Project Manager and Usability Lead of my thesis team, I plan scope and timelines, coordinate developers, designers, and testers, and make sure every deliverable is clear and on schedule. A Dean's Lister and Highest Honors graduate of STEM, I bring the same discipline to my studies and to my UI/UX work, designing user-centered interfaces from wireframes to prototypes. I have independently built multiple mobile apps, games, and web platforms using Python, SQL, HTML/CSS, and Flutter/Dart, and hold certifications from AWS, IBM, and Cisco. Seeking a software development or UI/UX role where I can lead, design, and deliver real products.

SKILLS

Technical: Python, SQL, HTML, CSS, JavaScript, Dart, Flutter, Git
Design: UI/UX design, Figma, wireframing, prototyping, usability testing, graphic asset creation
Project Management & Leadership: Project planning, task coordination, scheduling, documentation, team collaboration, time management

EDUCATION

Holy Angel University — B.S. Computer Science *2023 – 2027 (expected)*
- Dean's Lister, 2023 – Present

Saint Catherine of Siena Academy of Samal, Inc. — Senior High School (STEM) *2021 – 2023*
- Supreme Student Council Secretary
- With Highest Honors; Serviam Awardee; Best in Science; Gawad Gobernador Awardee; Gawad Talino Awardee (Mercury Drug)

Saint Catherine of Siena Academy of Samal, Inc. — Junior High School *2017 – 2021*
- With High Honors

PROJECTS

ViVy — GCash Receipt Fraud Detection (Undergraduate Thesis) *2026*
- Leader and Project Manager of a four-member thesis team; managed scope, timeline, and task allocation through Final Oral Defense.
- Coordinated the developer, designer, and QA tester, and led the usability evaluation (PSSUQ) as Usability Lead.

Daily Bread Book — Sales & Inventory Logbook for a Bakery
- Built the sales and inventory logbook of Daily Bread bakery: records each customer's order, discounts, and payments (cash, GCash, or both).
- Tracks bread in stock and generates a printable daily report as a PDF.

TailTales — Community App for Pet Owners *2026*
- Designing and developing a mobile app where owners browse adoptable pets and log daily milestones as a digital diary.
- Leading project planning and UI/UX design: defined features, user flows, and screen layouts from concept to prototype.

Glide — Mobile App for School Organizations (HAU School of Computing) *2025*
- Built the app in Dart/Flutter so organizations can register, presidents can log in, and announcements and updates can be managed.
- Handled the UI/UX design of the admin side and coordinated feature requirements with organization stakeholders.

Jeep Box Hero (Interactive Game) *2025*
- Developed a level-based game with inventory management, player dialogues, and progression tracking.

Page Replacement Simulator — Operating Systems Project, HAU School of Computing
- Interactive web app that simulates five page replacement algorithms with step-by-step fault and hit tracking, built with Flask and a REST API.

CERTIFICATIONS

- AWS Academy Graduate – Cloud Foundations (AWS)
- IBM – Artificial Intelligence Fundamentals
- Cisco – Data Analytics Essentials
- Cisco – Introduction to Data Science
- Cisco – Endpoint Security
- Cisco – CCNA Introduction to Networks
- Cisco – JavaScript Essentials 1 & 2
- Cisco – Cyber Threat Management
- FreeCodeCamp – Relational Database
- FreeCodeCamp – Responsive Web Design
- DataCamp – Intermediate Python
